

Power Jumper IC™
Sonos® PLAY:1 In-wall Power & Mounting Solution, WIP
 PN: C7HS-X-WIP-XX

Utilizing the Power Jumper IC™ in-wall interconnect and the Speedport™ SC, this is the perfect solution when installing Sonos® PLAY:1 wireless speakers.

The mounting solution is compatible with any 1/4-20 mounted speaker and will tighten both into the speaker and into the Speedport™ when fastened. Additional low voltage cables such as Cat5 can also be passed through the Speedport™ when not providing power.

In-Wall View

Parts Included

For new construction projects, add on our metal **Speedport™ New Construction Bracket**. Simply fasten to a stud and once the drywall has been laid, the bracket allows installers to use a rotozip opening to ensure proper size and placement of the hole.

PN: **SB-1**

Conforms to STD 514D and Certified CSA STD 22.2 No. 42.1-00
 Electrical Rating: 125 VAC, 15 AMPS, 60 Hz
 Meets UL 817 & CSA#22.2#21
 Interconnect meets UL 2256, 2459
 Meets NEC 2014 Article 400.7 (A)(11)
 Patented with multiple patents pending.
 All rights reserved. Sonos is a registered trademark of Sonos, Inc.

Also Available in 15', 25' and 40' lengths
