

# Wire Braided Wrap Sleeving

- Use the Wire Braided Wrap or Wire Braided Wrap Split for managing and hiding cables exiting the Wireport™ and Splitport™ plate or any hole which cables pass through.
- The aesthetically pleasing sleek look is combined with the properties of a 10 mil PET braided construction which makes this product rugged to withstand cuts, abrasions, and tension.
- Use this product where cables exit the wall and need to be managed for an uncluttered clean appearance.
- The cables are completely covered in the cable management application.
- The sleeving cuts easily with a hot knife for a clean edge.
- The Wire Braided Wrap Split incorporates a lateral split which allows the tube to open up to accommodate a wide variety of bundling requirements, and the semi-rigid braid configuration simply closes around the entire installation without the need for any additional fasteners. The 25% edge overlap (at nominal diameter) allows coverage around cables.
- The Wire Braided Wrap Split will bend to a tight radius without distorting or splitting open.

Wire Braided Wrap

Wire Braided Wrap Split
